VPAC is a Microsoft Windows Embedded Partner and OEM

VPAC, a leading, independent Advanced Computing R&D service provider, is a not for profit registered research agency established in 2000 by a consortium of Victorian Universities.

VPAC's mission is to provide independent expert services, training and support in Advanced Computing to its Members, industry and other organisations. VPAC provides professional R&D services in the application of advanced computing in the fields of Computational Engineering, Computational Software Development, Geospatial Sciences, Grid Computing and Life Sciences to assist Members, industry and other organisations to create innovations in research and development.
